[Labeling Variations 060920.pdf](#)

Attached please find the 3 labeling variations we will have with the Gen 2 product. We really need to finalize our labeling variations and REF numbers, can we talk about this tomorrow at the management meeting?

@Kent Lupino do you know if it's at all possible to have US and CE use the same labels? Thanks!

-Emma

Team~

If the 51-003-20 labels haven't been used yet, is there any reason we can't retract them from use along with the 51-003 REF and just update 51-002 to include the kit variation indicators?

Subject: PCO 20-020 and PCO 20-028

Hi Sylvie and Kent,

I've managed to find out what happened to the 2-30°C 51-002-20 and 51-003-20 labels after they were informally distributed to Medomics.

For 51-002-20 labels (PCO 20-028): they were applied to 1.4M BD US tests, I've included the lot list in the PCO as an attachment
For 51-003-20 labels (PCO 20-020): even though they were sent to Medomics, they have not used them in production, so I think we can pass this PCO off as the initial distribution of these labels to Medomics.

@Kent Lupino if you can fill in the reason why the back labels are released, these PCO's can be circulated for review and closed.
Thanks!

Best Regards,
